## FRONT-END ENGINEER

As a Front End Developer, I excel in dynamic and challenging production environments. My proven track record showcases my ability to deliver fast, accurate, and effective code, especially when responding to management requests for improving existing products or addressing critical infrastructure issues. I pride myself on being detail-oriented and self-motivated, always eager to embrace new opportunities and challenges

## SOFTWARE SKILLS

HTML, CSS, SASS	Redux, Redux-toolkit	MUI, ANT Design, Storybook
JavaScript (ES5/ES6+), TypeScript	RTK query, Tanstack Query	SRUM principles
Restful Api, GraphQL, Apollo Client	Git (GitHub, GitLab, Bitbucket)	Webpack, EsBuild, Vite
React JS, Next JS	Figma, Adobe XD	Node JS, Express JS, Nest JS

## PROFESSIONAL EXPERIENCE

### HODL HODL

Mar 2022 - Present

Contributed to the development of cryptocurrency contracts, specializing in facilitating Bitcoin platform transactions through contract creation. Key responsibilities included implementing feature-rich spreadsheets with advanced filtering and sorting functionalities, currency handling features, and the development and integration of modular components. Utilized a comprehensive technology stack comprising Redux for state management, RTK Query for efficient data fetching, Docker for containerization, and TypeScript for enhanced type safety and code maintainability and many other libs.

### Devinotech

SEP 2022 - 2024 Sep

- Web apps development, including implementation of design and providing functionality.
- I have collaborated with several renowned companies, including Unlimited Production and Hodl-Hodl.
- Developed UI interface and all functionality that was required. Created landing pages using custom development solutions and frameworks like MUI, Ant, Shadcn UI, depending on requirements.

### ArmCoding LLC

Jul 2020 - Mar 2021

- Worked with the wider development team.
- I have collaborated with several renowned companies, including Unlimited Production and Hodl-Hodl.
- Developed CRM systems with React, React Hooks, Context API, Redux and different design patterns used ready components and wrote custom ones if needed

## EDUCATION & CERTIFICATIONS

Special Physic-mathematical School after Artashes Shahinyan under the Auspices of Yerevan State University (09.2014 - 07.2018)  
Yerevan State University Informatics and Applied Mathematics and Computer Sciences  
Final Project - Linear Codes (09.2018 - 06.2021)  
Yerevan State University Informatics and Applied Mathematics and Computer Sciences (09.2021 - 06.2023)

## EXTRACURRICULAR ACTIVITIES

### Languages

Armenian (native), English (B2), Russian (C1)

### Certifications

Master's Program in Quantum and Mesoscopic Physics

### JS Inovatios (IoT) Jun 2023 - Sep 2023

Development part  
Create a monitoring systems with C# and React.js
